

Good evening councilpersons. I'm still Keith Shillington. I still live on Leucadia Scenic Court on the very north edge of our fair city. I still own and operate that little cyber Café at the corner of Second and E Streets downtown.

Thank you for the opportunity to address you.

That mass of plastic refuse in the Pacific Ocean continues to grow.  
California faces a heretofore unprecedented drought. And we're at the wrong end of the pipe.  
The world population is practically 6 and  $\frac{3}{4}$  billion people, growing rapidly.  
Inexpensive fossil fuel is now a topic for historybooks.

These problems face humanity with no simple solutions. Tonight I revisit a problem with a variety of solutions:

- Government waste of taxpayer money.

First, I'd like to thank you for making a partial correction from my comments on June 25<sup>th</sup>; I'd like you to know that I recently received only three copies of the legal notification regarding the zoning change for Pacific View Elementary.

I can tell from the data on the sticky labels that a duplicate removal process took place between the first mailing and this recent mailing. Good work. Partly.

I've been working with a bulk mailings myself recently, and am reminded that the list cleaning process is like heading West; no matter how far you go, you can keep going West.

So, tonight, esteemed Governance; I request that you keep up the good work, and strongly consider hiring that efficiency consultant. I look forward to the next time I get a legal notice; that I get, at most, one per address; and, at least, one.

Regarding the content of the notice: I'll come back next week to address a serious lack of deep thinking and future sight for Encinitas.

Thank you for your time and attention.
